Thank you for reaching out to us for our GIS data. Here are the instructions for accessing the data:

Using your file manager, log in to **sftp://ccmft.canyonco.org** (note that a file manager is important as File Explorer will not work for this; if you need to use a web browser, use this link:

https://ccmft.canyonco.org/

and know that you will not be able to batch download unless you opt for the WebClient Pro version):

U/N: visitant
P/W: Blu3co@tpin26

Once you log in you will see a 'Visitor' folder and inside of that you will see two folders 'Shapefiles and Tables' which is where the data is located. You can either download the shapefiles individually or all of them at once located in the Data Zip Files.

You can find ownership data in our Public Access site.

If you are interested in address point or centerline data, we need you to submit a Public Records Request to the Sheriff's office for this since we have changed our approach to disseminating that particular data. If you are requesting address point data, the PRR will be submitted to Development Services Department (DSD).

Parcel data ownership and geometry are updated nightly and reflected in our GIS data. This data also contains assessed values and characteristics for the annual assessment roll. Ownership can be found in our Public Access site.

** We do not track easements nor do we show them on our maps/GIS. Best way to locate any type of easement is by reviewing the recorded deed or recorded surveys/subdivision plats, or reaching out to a title company. **

Please note that the information provided cannot be used for purposes of a mailing or telephone contact list as set forth in Idaho Code 74-120.

NOTICE

These documents are maintained for assessment purposes and should not be relied upon for determining boundaries and current property ownership. Any use of these documents for other than assessment purposes, regardless of format, is at the user's risk. The Assessor's office assumes no liability, nor do we imply any particular level of accuracy.
