Re: FY2020 Pickles Butte Sanitary Landfill Monitoring Well Project

Dear Licensed Public Works Contractor:

On November 12, 2019, the Canyon County Board of Commissioners sent you a solicitation of bids for the above-entitled project pursuant to procedures suggested by Idaho Code 67-2805. On November 18, 2019, a walkthrough was held at the project site. Prior to November 22, 2019, the County received questions relating to the project such that we believe that this Addendum No. 1 to the solicitation is necessary. Note that no objections to the bid procedure have been received.

Please see Enclosure "A", affixed hereto and incorporated by reference, which includes a revised bid form that references Addendum No. 1. Bids remain due on December 2, 2019, by 9:00 a.m.

Sincerely,

David Loper, Director

Miscellaneous Clarifications:

1. The following information as well as the Solicitation of Bids in PDF format will be available on the County website at www.canyonco.org.

Questions:

Q1: Does the material have to be domestic only?

A1: The materials do not have to be domestic so long as materials meet specifications.

Q2: What are we doing with the drill cuttings?

A2: The drill cuttings can be piled on-site. Contractor can coordinate with landfill, who will transport and dispose of cuttings on-site.

Q3: Would this project require Prevailing or SCA Wage Requirements?

A3: No, this project does not require Prevailing or SCA Wage Requirements.

Q4: What is the proposed schedule?

A4: To commence as soon as possible with preferred completion no later than February 28, 2019.

Q5: Will well development be required? (If so, what are the requirements i.e. total well hole volume or turbidity levels?)

A5: See section 2:10 of Attachment 1 (Specifications and Blueprints) in the request for bid package. Development of the well is complete when turbidity is reduced and water is clear, as determined by Tetra Tech.

Q6: Will drilling and development water (if development is required) be contained or will it be allowed to infiltrate the surface?

A6: See section 2:10 of Attachment 1 (Specifications and Blueprints) in the request for bid package. To the extent that the question is not answered by Attachment 1, this water can infiltrate the surface and be channeled into storm water trenches developed by Canyon County in consultation with Contractor.

Q7: Will drill cuttings be contained or spread on site?

A7: See answer to Q2.

Q8: What are the sampling requirements for the drilling?

A8: Drill cuttings will be logged by Tetra Tech, but no core samples will be taken. Contractor has no sampling requirements.
