

Virtual Wildland Fire Field Trips!

Our Wildland Fire field trip program is a place based ecological experience designed to teach students, **grades 5+**, about how they interact with fire in the natural ecosystem of southwest Idaho, the sagebrush-steppe, and its surrounding human communities.

Our virtual presentation of this trip will immerse students in our typical programs. This includes an “**ecology hike**” to explore the park’s fire regime, a “**fire science lab**” to learn about fire behavior, and a “**wildland firefighting workshop**” where students learn about wildland firefighting tools and methods.

This one-hour virtual field trip combines footage from scenic Celebration Park with fun activities led by our interpretive team. Students will leave with a better understanding how wildfire relates to their lives and communities in southwest Idaho.

Please contact us at parksprograms@canyoncounty.id.gov to schedule!
