New Business: David Loper, Direct of Canyon County Solid Waste, led the meeting by giving an overview of the operations of the Landfill. He highlighted the Landfill is not a dump but a Sanitary Landfill. The average tons of waste Pickles Butte Sanitary Landfill receives daily is 1,200 which brings between 600-1,000 vehicles through the gate daily. David discussed the current design of the Landfill. Currently the landfill is 116 acres which contains no liner, leachate collection system and currently installing an LFG System. He also discussed the current ground water monitoring program. David discussed the Landfill is currently working on the expansion plans, site certification and the arid design. Once complete this will give Pickles Butte Sanitary Landfill 75 to 100+ more years of air space. The Landfill is also currently working on Gas Collection and Flare System, Dust Control and Hardscaping projects. The Household Hazardous Waste (HHW) program that Pickles Butte hosts four times a year is a huge draw. It has been very successful County wide.

David took the Committee members and the Ex-Officio members on a tour of the facility. After the tour, David gave the Ex-Officio the floor to give any updates and input. Bob Bennett, Travis Williams, and Mike Murgoitio are very excited to be part of this new group and they are looking forward in bringing their experiences to the Committee.
