 Two Nearest Cross Streets or Property Address City

Assessor's Account Number(s): R 3447900000 Section 3 Township 4N Range 3W.

Case No.: \_\_\_\_\_

This land:

Has water rights available to it.

Is dry and has no water rights available to it. If dry, please sign this document and return to the Development Services Department representative from whom you received it.

**Idaho Code 31-3805** states that when all or part of a subdivision is "located within the boundaries of an existing irrigation district or canal company, ditch association, or like irrigation water delivery entity ... no subdivision plat or amendment to a subdivision plat or any other plat or may recognized by the city or county for the division of land will be accepted, approved, and recorded unless:"

- a. The appropriate water rights and assessment of those water rights have been transferred from said lands or excluded from an irrigation entity by the owner; or
- b. The owner, person, firm, or corporation filing the subdivision plat or amendment to a subdivision plat or map has provided underground tile or conduit for lots of one (1) acre or less, or a suitable system for lots of more than one (1) acre which will deliver water to those land owners within the subdivision who are also within the irrigation entity with the appropriate approvals:

1. For proposed subdivisions located within negotiated area of city impact, both city and county zoning authorities must approve such irrigation system in accordance with Idaho Code Section 50-1306. In addition, the irrigation entity charged with the delivery of water to said lands must be advised regarding the irrigation system.
2. For proposed subdivisions outside of negotiated areas of city impact, the delivery system must be approved by the Planning and Zoning Commission and the Board of County Commissioners with the advice of the irrigation entity charged with the delivery of water to said lands.

To better understand your irrigation request, we need to ask you a few questions. A list of the map requirements follows the short questionnaire. Any information missing information may result in the delay of your request before the Planning and Zoning Commission and ultimately the approval of your irrigation plan by the Board of County Commissioners.

1. Are you within an area of negotiated City Impact?  Yes  No

2. What is the name of the irrigation and drainage entities servicing the property?

Irrigation: Black Canyon Irrigation District

Drainage: Black Canyon Irrigation District

3. How many acres is the property being subdivided? ± 31.41 ACRES

4. What percentage of this property has water? ± 65%

5. How many inches of water are available to the property? 20.52 acres of water

6. How is the land currently irrigated?  Surface  Irrigation Well  
 Sprinkler  Above Ground Pipe  Underground Pipe

7. How is the land to be irrigated after it is subdivided?  Surface  Irrigation Well  
 Sprinkler  Above Ground Pipe  Underground Pipe

8. Please describe how the head gate/pump connects to the canal and irrigated land and where ditches and/or pipes go.

We are proposing the new headgate be in the last box in the new reroute, located on the south side of property. The headgate goes into a weirbox that feeds our proposed pump station.

9. Is there an irrigation easement(s) on the property?  Yes  No

10. How do you plan to retain storm and excess water on each lot?

Individual lots are responsible for retention & treatment of storm water runoff including the application of perimeter lot berming to prevent direct lot discharge into irrigation facilities.

11. How do you plan to process this storm water /excess irrigation water prior to it entering the established drainage system? (i.e. oil, grease, contaminated aggregates)

Through filtration NO discharge of excess water will enter the established drainage system.

**Irrigation Plan Map Requirements**

The irrigation plan **must be on a scalable map** and show all of the irrigation system including all supply and drainage structures and easements. Please include the following information on you map:

- 1  All canals, ditches, and laterals with their respective names.
- 2  Head gate location and/or point of delivery of water to the property by the irrigation entity.
- 3  Rise locations and types, if any.
- 4  Easements of all private ditches that supply adjacent properties (i.e. supply ditches and drainage ways).
- 5  Slope of the property in various locations.
- 6  Direction of water flow (use short arrows → on your map to indicate water flow direction).
- 7  Direction of wastewater flow (use long arrows -----→ on you map to indicate waste water direction).
- 8  Location of drainage ponds or swales, if any where wastewater will be retained on the property.
- 9  Other information: \_\_\_\_\_

Also, provide the following documentation:

- Copy of any water users' association / agreement currently in effect which shows water schedules and maintenance responsibilities.
- Copy of all new easements ready for recording (irrigation supply and drainage).
- If you are in a city area of impact, please include a copy of the approvals by the city planning and zoning commission and city council of your irrigation plan.

===== Applicant Acknowledgement =====

I, the undersigned, agree that prior to the Development Services Department accepting this application I am responsible to have all of the required information and site plans.

I further acknowledge that the irrigation system, as approved by the Planning and Zoning Commission and ultimately the Board of County Commissioners, must be bonded and/or installed prior to the issuance of a zoning compliance or building permit.

111 North 11<sup>th</sup> Avenue, Caldwell, ID 83605 Phone: 208-454-7458 Fax: 208-454-6633

## GENERAL

1. How Many Lots are you proposing? 24 (4 common / 20 Residential)
2. Average Lot Size of the Residential Parcels? 1.30 Acres

## IRRIGATION

1. Irrigation Water is Provided via  Irrigation Well  Surface Water
2. What percentage of the property has water? ± 65 %
3. How many inches of water are available to property? 20.52 acres of water
4. How do you plan to retain storm and excess water on each lot?  
Individual lots are responsible for retention & treatment of storm water runoff including the application of perimeter lot berming to prevent direct lot discharge into irrigation facilities
5. How do you plan to process storm water / excess irrigation water prior to it entering the established drainage system?  
Through filtration No discharge of excess water will enter the established drainage system.

## ROADS

1. Roads within the Development will be:  Public  Private  N/A

## HILLSIDE DEVELOPMENT

1. Of the total lots requested, how many of the lots will contain slopes greater than 15%?  
0 Residential 0 Non-Buildable 0 Common
2. Will the proposed Road(s) be located within any area that has slopes greater than 15%  
 Yes  No

## SUBDIVISIONS WITHIN AN AREA OF CITY IMPACT

1. Will you be requesting waivers of Subdivision Improvements from the City?  
 Yes  No
2. If yes, which waivers will you be requesting?  
 Curbs  Gutters  Sidewalks  Streetlights  Landscaping

Professional Engineers, Land Surveyors and Planners

924 3<sup>rd</sup> St. So. Ste B, Nampa, ID 83651  
Ph (208) 454-0256 Fax (208) 467-4130  
Email: wmason@masonandassociates.us

LETTER OF EXPLANATION  
REZONE AND PRELIMINARY PLAT  
FREEZEOUT ESTATES SUBDIVISION

This is a request for a rezone and preliminary plat for parcel number R34479 located east of Freezeout Road and south of Willis Road, Middleton, Canyon County Idaho. The property is currently zoned County Agricultural. The parcel is approximately 31 acres. We are requesting County Residential (R-1) zoning. The lots will range in size from 1-1.24 acres.

Canyon County's future land use map indicates the future designation of this property as residential. This property is also in the City of Middleton's impact area and their future land use zone is residential. The City of Middleton has requested the developer enter into an agreement to annex the lots into the City as soon as the City reaches the property. The City has also asked for easements to be provided for future City sewer and water services. The City Engineer has reviewed the preliminary plat and believe right-of-way easements will accommodate future City water and sewer.

A Nutrient Pathogen Study has been completed. Southwest District Health (SWDH) and the Idaho Department of Environmental Quality (DEQ) have both reviewed the study.

A Phase One Environmental Assessment was also done and is included.

There are four subdivisions within 300 feet or less of this property, Willis Estates, Saddleback Ridge, Ranchette Estates, and North Slope Estates. Lot sizes in these four subdivisions vary from 4.88 acres to 0.36 acres. The average size lot size for these subdivisions is 1.25 acres. The request for the R-1 zone with the preliminary plat depicted lots ranging from 1-1.24 acres is consistent with the surrounding subdivision land use and lot size.

**Neighbor Concerns:** The neighbors have voiced their concerns for endangered species. There is an irrigation drainage area on the west side of the property. There are no plans to disturb the area that may house wildlife. Included in this packet is the United States Fish and Wildlife Services endangered species list for this specific property. Per U.S Fish and Wildlife's Information for Planning and Consulting (IPaC), this location is likely to be home to a threatened plant called the Slickspot Peppergrass. It is also likely to be home to the monarch butterfly which is only considered a candidate. There are no other plants or animals that U.S Fish or Wildlife is concerned about in this area and there are no endangered plants or animals that utilize this property. The irrigation drainage area will not be used for a building area. It will remain a drainage area.

Professional Engineers, Land Surveyors and Planners

Page 2 of 2

---

The neighbors have also expressed concern their wells are in danger of going dry. Included in this packet are the results of Idaho Department of Water Resources (IDWR) monitoring well closest to this subdivision. These results indicate water levels vary from year to year but this area is not an area of concern for IDWR. The monitoring well 04N 03W 04DCB1 is approximately 1.2 miles from this location. The highest level of groundwater recorded was in 2019.

We believe that a request for R-1 zoning is in compliance with the County's comprehensive plan and is desired by the City of Middleton. The layout fits well with the surrounding residential subdivisions.
